

- Companies don't know what they want

• Behonest and you're okay

- You'll learn SO much at your first job

• Once you're in, you're in

- You still want to put in a year at your first programming job

- Once you get your first job, you're journey has just begun

• Keep learning and honing your craft

Learning  
programming to  
make useful  
programs

Learning  
programming to  
make games

Learning  
programming to  
make Reddit bots

Learning programming  
to hack source code  
from a crappy game  
you found on Steam  
and then debug it

Hire a bad  
programmer and  
learn programming  
to fix his software

Learn programming  
to make a top post on  
r/ProgrammingHumor
